ABDOLKARIM KARIMI

WEB DEVELOPER

SUMMARY

As a recent graduate from the UC Berkeley Extension Coding Bootcamp, I am driven by a strong passion for continuous learning and skill development. My journey has been one of transformation, transitioning from a background in arts, sales management, hardware, and customer relations to becoming a proficient full stack web developer.

My time at the bootcamp has equipped me with a solid foundation in modern web technologies, enabling me to build dynamic and responsive applications from scratch. I have honed my expertise in both front-end and back-end development, allowing me to create comprehensive and user-friendly web solutions. My proficiency extends to languages such as HTML, CSS, JavaScript, and frameworks like React, as well as server-side technologies like Node.js and Express.

PROJECTS

CinemaSearch

Css, Javascript *Feb 2023 - Present*

CinemaSearch is a feature rich search engine for finding the latest movies and tv series. Using the combined capabilities of The Movie Database API and StreamingAvailability API, users can search for all sorts of movies and tv, new and old, with a simple to follow search box.
It was a group project, and the first time we had to work with other developers to create a project. We used a combination of HTML, CSS, Javascript, and jQuery to create the front end, and used the APIs to pull the data. We also used the Materialize CSS framework to help with the styling. The project was a great learning experience, and we were able to create a great looking and functional website in a short amount of time.

EXPERIENCE

IT Techician | Hardware Technician | Customer Relations

LottoShield *Feb 2022 - Dec 2022*

In my previous roles, I have accumulated diverse experience in various facets of the technology and customer relations domains. I have diligently served as an IT Technician, Hardware Technician, and contributed effectively to enhancing customer relations.

As an IT Technician, I successfully managed a range of technical tasks, ensuring seamless operation of hardware and software systems. My responsibilities encompassed diagnosing and troubleshooting technical issues, promptly addressing user concerns, and executing efficient solutions to maintain optimal system functionality.

In the capacity of a Hardware Technician, I displayed meticulous attention to detail while undertaking hardware-related assignments. My role involved assembling, configuring, and maintaining hardware components, while adhering to industry best practices and quality standards. My commitment to precision resulted in the reliable performance of hardware systems.

Within the realm of Customer Relations, I consistently prioritized customer satisfaction by fostering positive interactions and building strong rapport. My adept communication skills enabled me to comprehend customer needs, provide tailored solutions, and address queries promptly. I consistently maintained a professional demeanor, facilitating enduring customer relationships.
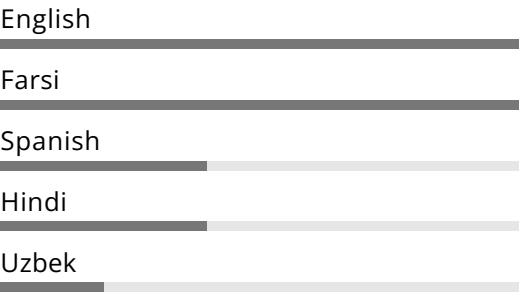

Student

UC Berkeley Extension Coding Bootcamp

Jan 2023 - Aug 2023

As a student of UC Berkeley Bootcamp, I have completed multiple projects and assignments. As a result, I gained knowledge and experience in the following technologies: HTML, CSS, JavaScript, jQuery, Bootstrap, Node.js, Express.js, MySQL, MongoDB, React.js, and many more. Worked with other students to created multiple projects and assignments.
